1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.
2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the network as set forth in claim 16 must be shown or the feature(s) canceled from the claim(s).

No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet"

pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

3. The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: Network (claim 16).

4. Claims 4 and 10 are objected to because of the following informalities:

In claim 4, there is no antecedent basis for “delay time”; it is unclear as to what t4ba; t4ab; t5aa; t5bb are; they are not clearly defined;

In claim 10, last para, it is unclear as to what “these values” are; perhaps applicant intends to say “said difference in time and said maximum voltage” instead.

Appropriate correction is required.

5. Claims 1-14, 16-19 are allowed.

6. The following is a statement of reasons for the indication of allowable subject matter: The prior art fails to show determining the difference in time for the detection of the field change in the control coil and the receiver coil

respectively; determining the time of penetration through the object to be measured and determining therefrom the thickness or electrical conductivity of the object.

7. This application is in condition for allowance except for the above informal matters.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 25 USPQ 74, 453 O.G. 213, (Comm'r Pat. 1935).

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Note PTO-892.
